**INSTALLATION OF OVERHEAD SIGN STRUCTURE ON
EVERETT TURNPIKE IN NASHUA WILL REQUIRE LANE CLOSURES
WORK SET FOR DECEMBER 6 AT EXIT 2 SOUTHBOUND**

The New Hampshire Department of Transportation announces the planned installation of an overhead sign structure on the southbound side of the Everett Turnpike in Nashua will require lane closures on Friday, December 6, 2002.

This work will take place on December 6 from 9:00 am until 2:00 pm, weather permitting. It will involve the installation of an approximately 120-foot overhead sign structure that will span all the southbound lanes. Lane closures will be necessary to perform the work. A State Police rolling roadblock lasting five to seven minutes will be used to allow the structure to be set in place.

Motorists traveling southbound on the Everett Turnpike on December 6 should be aware of lane closures and slowing traffic in the vicinity of Exit 2. Some delays can be expected.

R.S. Audley, Inc. of Bow, New Hampshire is the contractor for the sign installation project.
